

Expert, compassionate
**health care
for women.**

Saint Vincent is the hospital of choice for twice as many expectant parents for the delivery of their babies. One important reason is the expertise and compassion of our OB/GYN and family physicians and nurse midwives. As we move forward, it is the care—and caring—these experts extend that has made us the premier provider for OB/GYN services in the region. And it is why we will continue to be the hospital of choice for patients in the future.
